Paper Outline

I. Section I: Introduction

A. Problem Description
B. Objective of Your Paper
C. Section Road map: In Section II we will,....

II. Section II: Literature Review: Place your work in perspective.

III. Section III: The Data: A Description

IV. Section IV: Model Formulation and the Estimation Method

V. Section V: Estimation Results and Specification Tests

A. Specification Tests:

1. Exclusions (Do variables or various subsets of interest belong?)
2. In various Respects of Interest, is the model different for different demographic groups?
3. Tests for Functional Forms (if applicable)
4. Tests for Endogeneity (if applicable)
5. Other Specification Tests of Interest
B. Coefficient Results: Signs and Magnitudes + implications

C. Marginal Effects for any model other than the linear regression.

VI. Conclusions
